

# UNHINGED SUPPLY WITH HINGED FOAM CONTAINERS

## Resin Production Meets The Perfect Storm

As foam hinged containers rely heavily on resin for its production the severe disruption to resin production has impacted the ability to produce hinged foam containers. Here is what you need to know:

- Most North American plastic resin production takes place in southeast Texas.
- The resin facilities experienced hard shut-downs due to power losses and freezing temperatures.
- Pactiv's polystyrene resin suppliers declared force majeure and placed Pactiv on allocation for 60 days.
- This a domestic disruption to the resin supply and will have industry-wide implications into the summer of 2021.

## NON-FOAM ALTERNATIVES TO OUR MOST POPULAR FOAM CONTAINERS
